## EXPERIENCE

### Software Engineer II | Formally

San Francisco, CA / Hybrid | Apr 2022 – Present

*Built and scaled a full-stack legal automation platform using **Next.js**, **Node.js**, **PostgreSQL** & **Google Cloud**.*

- Scaled the platform from 0 to **150+ daily active users** and helped drive the company to **profitability**.
- Resolved **500+ client issues** directly, improving retention and informing product decisions.
- **Owned** architecture and operations across the stack; automated CI/CD pipelines to cut setup time by **80%**.
- **Mentored engineers, managed contractors**, and led technical reviews to raise quality and velocity.

*Key Project:*

- **Workflow Automation System** – Designed and launched a **versioned, extensible system** automating **400+** legal workflows. Cut onboarding time from weeks to hours, empowered clients to build custom workflows, and **saved hundreds of engineering hours**.
- 

### Software Engineer | Sidebar

Remote | Aug 2021 – Apr 2022

*Built real-time "virtual office" experiences using **WebSockets**, **React**, **MobX**, **Ruby on Rails**, **PostgreSQL**.*

- Built **live in-call reactions** and **low-fatigue video experiences** using **React** and **WebSockets**.
  - Actively participated in Sprint Planning, helping scope deliverables and prioritize backlogs.
- 

### Software Engineer, Open Source Contributor | Hack for LA

Remote | Jun 2021 – Nov 2021

*Contributed to large-scale civic tech projects as an **open source software engineer**.*

- Automated **CI/CD** processes using **GitHub Actions** to streamline inactive team management.
  - Collaborated with a 12-developer distributed team on frontend architecture using **Docker** and **React**.
- 

## EDUCATION

**App Academy, San Francisco, CA** - Software Engineering Bootcamp | Nov 2020 – Mar 2021

**South Ural State University, Russia** - 4 of 5 years, Specialist Program in International Relations | 2008–2012

*Additional Coursework:*

**Udemy** — Data Structures & Algorithms | Jun 2021

**Arizona State University** — OOP in Java, Psychology, Engineering - Remote | Dec 2020

---

## SKILLS

**Frameworks:** Next, React, Redux, MobX, JavaScript, Node, Ruby on Rails, HTML5, CSS, Express.js, Python

**Databases:** PostgreSQL, MongoDB, Redis, Firebase, Prisma, SQL

**Tools/Platforms:** Git, Docker, AWS S3, Retool, Okta, Playwright, Google Cloud

**Practices:** CI/CD, Agile, TDD, Load Testing, SQL scripting, Postmortems, PRDs, Customer Support, REST
